Nefopam Hydrochloride

National Cancer Institute

Source

National Cancer Institute. *Nefopam Hydrochloride*. NCI Thesaurus. Code C83995.

The hydrochloride salt form of nefopam, a centrally-acting, non-opioid benzoxazocine with analgesic activity. The mechanism of action through which nefopam exerts its analgesic effects is, as of yet, largely unknown but may involve inhibition of serotonin, dopamine and noradrenaline reuptake.
