

Review of: "Flood Prediction Using Artificial Neural Networks: A Case Study in Temerloh, Pahang"

Burak Kizilöz

Potential competing interests: No potential competing interests to declare.

1-Abstract section is so long and the abstract doesn't have novelty in it,

2-How authors make sure their methods have validated with this data?

3-The authors must add control parameters for ANN model

4-Conclusion lack of novelty. Please rewrite your conclusion and add some highlight and novelty in it.
