**Potential competing interests:** No potential competing interests to declare.

This is a well-written paper that reveals the development of veterinary services in Zimbabwe and I recommend it for publication with improvements in a few parts.

1. Which issue of veterinary services this manuscript wants to address is not clearly introduced.
2. Multiple subjects related to veterinary services in Zimbabwe are mentioned in this manuscript, but the relationship between different subjects is not elaborated.
3. This paper does not follow the paradigm of literature review writing.
4. Several relevant suggestions have been proposed in this manuscript, but the opinions are lacking in basis. It is necessary to strengthen the explanation of data or cases to enhance the credibility of policies.
