

Review of: "Skin related health issues among health care workers due to utilizing of personal protective equipment during COVID-19 pandemic in Pakistan"

Toufique Ahmed

Potential competing interests: The author(s) declared that no potential competing interests exist.

Generally it is a good work. but I think it is a part of the work.

some grammatical mistakes such as: in this study found..

the authors described the problems of using PPE (mainly skin problems) but they did not specify the knowledge gap. Why this study is needed as everyone knows the skin problems?

the data analysis was not enough. which group are most reluctant to use PPE and which group not? and why?
