Review of: "Can we ensure Fire safety in Buildings that don't require NOC from the Fire Department?"

Gaurav Shorey¹

1. Architecture, School of Planning and Architecture, India

Dear Dr. Singh,

Thank you for this eye-opening article that brings forth a pressing need in the burgeoning cities of India today. Your work is likely to create an impact that will save millions of lives in the future. Can you explore the cost implications of implementing the NBC recommendations at a household level? We are well aware of the irreparable loss in case of a fire, and yet, one can imagine building owners being penny wise and pound foolish in such cases. Knowing that equipping their homes with the necessary precautionary provisions is affordable might allow people to invest in such infrastructure with more eagerness than they do for air conditioners and other lifestyle products.

Also, could you elaborate, maybe via a table, as to what it would look like to implement the NBC?

Thank you once again for all your good work.
