Potential competing interests: No potential competing interests to declare.

The author has to address to the few questions raised and the article requires those modifications in the text.

The study Abstract should have a well defined methodology stating what type of review they are undertaking (Narrative or systematic review).

The outcomes of the research should be stated clearly and must be explained with statistical significance in the abstract section.

The type of statistical analysis utilised should be stated in methods section.

The concept is interesting but the outcomes of the selected trials can be explained in a tabular form in the results section.
