Dear Author

How are you?

Here's the Reviewer's comments

1. The abstract doesn't cover details of the article; it needs results (by numbers) and also conclusions.
2. Where is the table of nomenclature?
3. Where are the objectives of the work? The author has to write objectives of the work and must put them after the end of the introduction.
4. You wrote, "Neumann boundary conditions are to be set and all the variables are assigned as zero." How? Inlet boundary is velocity, outlet is pressure,etc., where are they?
5. Discuss figures 6(a), 6(b), and 7, giving reasons.
6. The author should update the list of references with new references as follows

- <https://www.techscience.com/fhmt/v19n1/52397>
- <https://doi.org/10.1002/htj.21897>
- <https://doi.org/10.18280/mmep.080413>
- <https://doi.org/10.18280/mmep.090227>

Best Wishes
