

# Review of: "Techno-Economic Fermentative Microbe-Based Industrial Production of Lactic Acid (LA): Potential Future Prospects and Constraints"

Jagadeesan Aravind Kumar<sup>1</sup>

<sup>1</sup> Saveetha University

Potential competing interests: No potential competing interests to declare.

1. First of all, what is the novelty of this work?
2. The introduction can be rewritten with recent references.
3. What are the parameters influencing during the production of High-Performing LA-Microbial Strains?
4. The impact can be discussed using statistical analysis.
5. What are the applications of such lactic acid?
6. Discuss the pros and cons of various methods for producing the microbial strains.
7. Refer and include the following references: a. <https://doi.org/10.1016/j.fuel.2022.123594>
8. b. <https://doi.org/10.1016/j.chemosphere.2023.138680>
9. c. <https://doi.org/10.1016/j.envres.2021.112070>
10. Rewrite the abstract and conclusion based on the added contents.
11. Overall, the English is not good. It is to be checked by a native speaker.
