Potential competing interests: No potential competing interests to declare.

The manuscript has been written very well. I have some concerns and comments that should be considered:

1. Please provide an adequate literature review related to your study and indicate how you can make use of the available studies.
2. What is the title of Table 1? Similarly, for Tables 2 and 3, please indicate their titles.
3. In Table 3, there are some typographical errors. In line 2 (last column) of that table, "I am a ..". Please correct ("ama").
