Review of: "Optimized Low-Powered Wide Area Network within Internet of Things"

Shayma Wail Nourildean[1]

1 University of Technology - Iraq

1. Some of the abbreviations should be defined either where it located within the paper or in the list of abbreviations.

2. The author presented each work in the related work in too detail. Each work must be described briefly means that what is the study was done and what is the advantages or the results and what are the drawback if any.

3. What is the difference of this study and the previous works you described in the related work

4. The author presented performance comparison between the proposed method and other protocols. He must define these protocols briefly such as (DASH7, EXPLORA-T, ... etc).

5. In the research method, the author presented Scenario 1 and the figure (Figure 4.2) is the comparison between scenario 1 and scenario 2. Please explain it is the scenario 2 of the next section or what ??? clarify.

6. Figure 4.2 and Figure 4.3 are comparison between scenario 1 and scenario 2 please explain it well.

7. In Figure 4.4, what is the difference between dotted and solid lines. Please explain it in the paragraphs.

8. The comparison of the proposed model with other protocols must be in another scenario for example

9. Conclusion must include the summery and the section will be conclusion only which described the summery and the proposed algorithm and the results as well as a picture of future work.

10. The conclusion must investigate the aim and objective of the study which it is described in the beginning of the study.
