Pillule Dosage Form

National Cancer Institute

Source

National Cancer Institute. *Pillule Dosage Form*. NCI Thesaurus. Code C149758.

Solid preparation for homeopathic use, obtained from sucrose, lactose or other suitable excipients. Pillules may be prepared by impregnation of preformed pillules with a dilution or dilutions of homeopathic stocks or by progressive addition of these excipients and the addition of a dilution or dilutions of homeopathic stocks. Pillules are intended for oral or sublingual use.
