

Review of: "Teaching the seasons of the year to kindergarten students using desktop virtual reality. A comparative study"

Anthony Anggrawan

Potential competing interests: No potential competing interests to declare.

* In the Article title:

It is recommended that the dot symbol that separates the title and subtitle in the article title be replaced with a colon symbol. Replace "Teaching the seasons of the year to kindergarten students using desktop virtual reality. A comparative study" with "Teaching the seasons of the year to kindergarten students using desktop virtual reality: A comparative study"

* In the Abstract subsection:

Authors must add the research objectives (explicitly) in the Abstract subsection. Please complete it.

* In the Introduction subsection:

At the end of the discussion in the Introduction subsection, the authors should state the manuscript's systematic/organization of subsequent writing (next subsection). Please complete it.

* In the Related works subsection

In the Related works subsection, the authors need to point out that previous related work is different from the current research. So that the authors show that the article under study has strength or novelty that has never been researched before. Please add it.

* In the Method subsection

- a. Please add a research methodology flow/block diagram to show the research's sequence or process.
- b. Please describe the data sampling technique used in your research (mention the name of the sampling technique and the sample obtained from the population)
- c. It is better to include the amount of data (population) and the number of samples from the sampling results used in the study.
- d. It is recommended to include a web link containing a list of pretest and/or post questions.
- e. It is advisable to include the results of the validity and reliability tests of the pretest and/or posttest instruments used.
- f. It is best not only to explain what interview and questionnaire questions are asked to respondents in the manuscript, but also a web link so that readers can access/find out about the interview and questionnaire asked to respondents

g. Show a block diagram that illustrates the learning procedure applied to your work.

*** In the Result subsection**

(a) It is better if the research findings are also presented in graphs.

(b) It is best to include the results of Cronbach's test in the manuscript
