TITLE: IMPACT OF RISK FACTOR DIABETES MELLITUS ON PATIENTS WITH PERIODONTITIS

The manuscript provides information on diabetes mellitus as risk factor for periodontitis.

The following few modifications may be made to the paper:

1. The manuscript may be organized into sections; for eg: Diabetes mellitus in pathogenesis of periodontal diseases, Impact of diabetes mellitus of periodontal treatment planning, Impact of diabetes mellitus on prognosis in patients with periodontal disease
2. A more in-depth description of the role of DM in the pathogenesis of periodontal disease may be given
3. In the treatment planning aspect, the glycemic control and the variations that have to be made in the treatment plan may be added.
