

Review of: "Stellate ganglion block for anosmia and taste disturbance due to Long-COVID"

Prathepa Jagdiish

Potential competing interests: The author(s) declared that no potential competing interests exist.

- The method of adopting SGB to reverse dysautonomia by the author is good.
- The limitation of the study is that there is only one case for discussion. A good analysis could not be brought by one case.
- Author could discuss further more regarding the SGB's mechanism of action , duration , adverse side effects, cost - to bring more clarity to the reader.
- Author has said as "few days to resolve". It could be well described by the exact number of days which gives further clear picture for the future treating physicians.
