Dear Author,

The study is quite interesting, although few points sought clarification.

1. The title should be modified as "Effect of Pelvic Floor Muscle Strengthening Exercises on Urinary Incontinence in Patients with Cervical Cancer Undergoing Radiation Therapy at a Tertiary Cancer Centre".
2. Abbreviations used in abstract should be expanded on their first use.
3. In the Introduction section, hypothesis and aim of the study should be clearly mentioned.
4. CTRI registration numbr must be mentioned in methodology section.
5. Subects between 18 and 65 years of age were included. Provide a justification for this vast age range.
6. Reliability of the questionnaire must be mentioned in values with proper citation.
7. None of the figures was cited. Have authors drew them by themselves, if not, then credit must be given to the original developer.
8. Limitations, strength of the study and future recommendations must be clearly elaborated.
