Potential competing interests: No potential competing interests to declare.

The paper critically examines a pertinent aspect of enhancing LSRW skills in English language learning, with a particular focus on the influence of the virtual world. While the virtual realm holds undeniable appeal for learners, it may prove cumbersome for non-native speakers. Nevertheless, this paper deserves appreciation for shedding light on the profound impact of the digital world on contemporary learners. Although learners are increasingly drawn to the allure of the virtual world, its potential for future development and practical implementation remains uncertain.
