

Review of: "Assessing Sex Education Awareness Among Higher Secondary School Students in India"

Marisen Mwale

Potential competing interests: No potential competing interests to declare.

The paper is insightful and significantly contributes to the body of knowledge in Sexual reproductive and Adolescent health. There are however areas that the authors could wish to work on as follows:

1. Findings and results: The findings and results sections could be merged into a single section. The findings could be presented first followed by the associated Table.
2. The discussion should include some critical and analytical interpretation of the findings in line with what has already been done in the area specifically in India - What is new, what is unique in terms of knowledge generation and moving forward what is critical for the focal area.
