

Review of: "Unravelling the Phytochemical and Pharmacognosy Contour of Traditional Medicinal Plant: Pterocarpus Marsupium Roxb"

Miguel Meneses

Potential competing interests: No potential competing interests to declare.

The article titled "Unravelling the Phytochemical and Pharmacognosy Contour of Traditional Medicinal Plant: Pterocarpus Marsupium Roxb" is conscious and well organized, it presents a review of the phytochemical constituents and the biological activities reported in scientific journals.

Before publishing the article could be improved considering some suggestions.

- Authors should review and correct grammatical errors and correct joined words. Also, to write scientific names in italics
- Authors should update references used in the introduction to relate to topical statements.
- There is no response to the objective of relating chemical composition to pharmacological activities.
