Review of: "School instability in South Africa: a Systematic Review of Reflections and Experiences for a way forward"

Cornelia Wessels

1 North West University South Africa

**Potential competing interests:** No potential competing interests to declare.

A must needed Research.

It is difficult for me to understand that the researchers did not give any attention to the Methodology of a Systematic Review. Without that the article (research) can not been seen as scientific. There are different guidebook steps for conducting a systematic review and I do not see any reference to that.
