

# Review of: ""Establishing a Multi-disciplinary Adult Oncology Unit at Muhimbili National Hospital: Lessons Learned, Challenges, and Opportunities Amidst Tanzania's Growing Cancer Burden""

Sigfrid Casmir Shayo

Potential competing interests: No potential competing interests to declare.

Little has been done to address the reviewer's comments.

- The purpose of this paper and its outline (flow) are still not clearly stated. This makes the reader wonder what might come next while reading the text.
- The abstract is still vague and unappealing; I recommend that the abstract should not be a mere summary of the text but rather it should state the purpose of the work in context and highlight the main issues; challenges encountered, lessons learned, opportunities, etc.
