# Gp100:280-288 Peptide Vaccine

National Cancer Institute

## Source

National Cancer Institute. *gp100:280-288 Peptide Vaccine*. NCI Thesaurus. Code C2767.

A vaccine consisting of the amino acids 280 through 288 of the melanoma antigen glycoprotein 100 (gp100) with potential antineoplastic activity. Vaccination with gp100:280-288 peptide may stimulate the host immune system to mount a cytotoxic T lymphocyte (CTL) response against tumor cells positive for the gp100 antigen, resulting in decreased tumor growth. (NCI04)
