

# Review of: "The Role of Women's Business Performance in Promoting Sustainable Development"

S.K. Matharu

**Potential competing interests:** No potential competing interests to declare.

The topic chosen is very apt . However the content of the paper does not justify the title of paper. As to how business performance promotes sustainable development.

Repetition of (understanding the factors affecting women's MSEs' business performance) in introduction para 2,3,4 & 5).

The variables for measuring sustainable development are found missing.

Methodology needs to be reframed as it is to be explained in context with the present study. It is more of explanation of tools of research analysis.

Overall the authors have made a good attempt by choosing the topic of relevance and measuring the impact . However the sustainable development factor needs to be explained and analysed in the context of performance of women owned business.
