

# Review of: "Effects of Teachers' Professional Development on Students' Academic Achievement"

Arturo Basbas

Potential competing interests: No potential competing interests to declare.

The study is well written and presented. Quasi-experimental is not easy, but the author is assured to follow the directives of the study. However, for the improvement of the manuscript, it is better to: 1) include a few lines in the abstract regarding the sampling procedure; 2) elaborate on the essential application of the theories associated with the study and include the author's own theories and principles of the study; and 3) expound and explicate the conclusion based on the results.

Thank you very much.
