Dear Author,

I find your article interesting, but I have some suggestions that may improve the quality of your paper:

1. The abstract should include the most essential information about the study, such as the justification for the chosen research theme as well as the aim of the study.
2. The methodology part of the study should also be supplemented by the purpose of the study and the research questions.
3. Do the results from your paper differ from previous research conducted by other authors? Add some more statements from other authors to the discussion.
4. The article should have an appropriate form. Divide the article into longer thematic sections. Just a few parts. Remove headings that refer to multiple sentences. Create longer, thematically related subsections. Each new idea does not require the creation of another subsection; division into paragraphs in longer chapters is enough.
5. Please check the references and provide the list of references in one of the reference styles (i.e., APA 7).
