Review of: "New Approach for Targeting Small Molecule Candidates for Intrinsically Disordered Proteins"

Aditya Singh¹

1. Pharmacy, Integral University, India

This is a well-written and informative draft, and it effectively introduces a computational strategy for addressing the challenges of drug discovery against intrinsically disordered proteins (IDPs) like tau. If possible, add a brief statement on the criteria used during filtering—e.g., any Lipinski's Rule, molecular weight cutoff.
