I have gone through this manuscript. I would suggest the authors to include a few of the comments in the manuscript...

Comment 1: I would suggest adding some of the key points that have been ramped up to tackle the challenges listed.

Comment 2: Give some basic briefing on the neutrosophic sets basics to enrich the synthesis of findings.

Comment 3: I would suggest you go through these papers as they define neutrosophic theory fundamentals as well as the COVID impact
