

Review of: "Histopathological Patterns of Cervical Cancer Among Females Presenting to Makerere University Pathology Core Reference Laboratory. A 5-Year Review"

Boniface Ago

Potential competing interests: No potential competing interests to declare.

These are my observations and comment:

1. The title is appropriate and suitable for publication. It has relevance to medical practice and research.
2. The abbreviation for Visual Inspection with Lugol's Iodine is VILI and not VIL
3. The style for the presentation of scholarly information in the INTRODUCTION should be in continuous prose segmented in paragraphs, rather than numbered subtitles with repetition of information.
4. The first paragraph of the discussion is not necessary again since this information recurred on several occasions.
Please remove.
5. I give a score of 3/5
