

Review of: "Examining Water Use and Sanitation Practices in Rural Schools of Chegutu District, Mashonaland West Province, Zimbabwe"

Lémonla Armel Otekpo

Potential competing interests: No potential competing interests to declare.

1- In your abstract, you mention that 81 questionnaires were administered. Please provide additional statistical data to the abstract.

For example:

- selected rural secondary schools in Ward 11 and 29 of Chegutu District in Zimbabwe :

- How many schools have you scheduled?
- How many schools have you covered?
- The 81 questionnaires represent a total of 81 respondents in the two districts,
- How many girls (students) ? How many boys (students) ?
- Did your questionnaire include any school administrators? If yes, how many.

On the whole, your abstract

is not bad. But a little insufficient in terms of primary statistical data.
