Potential competing interests: No potential competing interests to declare.

Ensure that citations are incorporated into the body of the paper, including references to the listed sources and other pertinent references.

This article falls short in its comparison of practical implementations of various methodologies and neglects to assess the drawbacks of existing approaches. It fails to consider the potential quantitative outcomes and time frames for agricultural practices and whether they adequately meet current needs or serve as replacements for traditional land-based methods.

Additionally, the article lacks the scientific rigor expected in scholarly publications, evident in its limited use of references.
