## ***Report on the paper***

A connection between the Gompertz diffusion model and the Vasicek Interest Rate model

This paper considers a new connection between the Gompertz diffusion model and the Vasicek Interest Rate model based on elementary stochastic calculus and Itô's calculus.

I think there is not enough innovation in this paper. Also, the literature review was not considered precisely, and the references are old to some extent. Furthermore, the manuscript is poorly structured and has grammatical errors and typos.
