The article is not a scientific article, as it does not contribute anything new to science. It should improve the following aspects:

- 1- The abstract does not include the fundamental objective of the paper, it makes a brief summary of cryptocurrency volatility.
- 2- The introduction is too short.
- 3.- The literature review should include more references.
- 4.- In section 3, it should include a description of the equation parameters.
- 5.- I miss an empirical application of the model.
