Aneurysm of sinus of Valsalva

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Aneurysm of sinus of Valsalva. ORPHA:1054*

Sinus of Valsalva aneurysm (SVA) is a rare congenital heart malformation of one or more of the aortic sinuses, consisting of a dilation that when unruptured is usually asymptomatic but when ruptured presents with progressive exertional dyspnea, fatigue, chest pain and that can lead to congestive heart failure if left untreated.
