Potential competing interests: No potential competing interests to declare.

1. Improve summary, aim, place, materials and methods; most important variables and results should be included.
Likewise, in keywords, reduce the number of words in each one.
2. In the introduction, it would be good to incorporate some sources of information (journal, etc.).
3. It is suggested to add more current sources of information under discussion.
4. It is suggested to exclude recommendations. Likewise, in relation to the conclusions, they should be more forceful and linked to the aim of the experiment.
5. It is proposed to improve the references by following some style. Likewise, incorporate recent bibliographic sources.
