Following issues must be rectified before considering this manuscript for publication

I suggest the use of technical term and improvement of English.

Explain the role of CD4+/CD8+ T in immunity and cause of impaired CD4+ T

Mentioned the main species of Firmicutes and Bacteroidetes, class of bacterium that dominate in gut microbiota.

Add more detail of genetic factors involves in Pathogenesis of disease.

For each therapeutic product (i.e D-mannose, Vitamins, Magnesium and B Vitamins) linked some clinical studies that supports experimental evidences for use of these as drug.

If possible add the comparison of mentioned therapeutic drugs with other to emphasize the importance of them as compared to other.

In figure 1 citation add the details of keywords used in picture
