Potential competing interests: No potential competing interests to declare.

The manuscript accepted with major revision.

1. The dataset and survey is taken from Bangladesh in 70% of the paper. then why considering the Australia in introduction part? explain it

2. What is NDVI? How it related to this paper?

3. Give proposed architecture with explanation

4. The organisation of the manuscript is very poor. Arrange it properly.

5. Materials and methods section is very poor. Detail explanation is required

6. Recent references should be added. Most of the papers are very old papers
