¹ Government College of Engineering, Salem-11

Potential competing interests: No potential competing interests to declare.

Include a minimum of 30 citations in the introduction part and discuss the uniqueness of *quinolone* derivatives.

Figures 2, 4, and 6. Modifications required as per standard.

Add some more literature for *antiplatelet activity*, *anti-HIV activity*, *antimalarial activity*, *antitumor activity*.

All synthesis schemes should be presented in tabular format for better comparison.
