I have read through this paper, and I find it an exciting study. However, I am struggling to get a handle on the category of the paper: an op-ed or a research study. If it is a research paper, it does not have research questions nor does it have a theoretical framework to explain the subject matter. Additionally, there was no methodology. This is my challenge in reviewing this paper. If the author(s) has framed it as academic research, it is still way off to be considered one but if it is an op-ed, it is okay for publication.
