Potential competing interests: No potential competing interests to declare.

The paper was not arranged acceptably. The introduction was not written correctly, so the information was not sequenced to fill a gap in the importance of this research.

No papers published in the last years (2020 to 2023) are mentioned in the manuscript, since tens of papers are published annually in this discipline.

In addition, the characteristics of the materials used in the concrete were not mentioned, and no pictures were added.

The tests performed were not detailed, jumping from 2.2. Specimens Description to 3. Discussion and Conclusion.

The standards of conduct for the tests were not mentioned.

The discussion is not written.

I must therefore reject it.
