# Arg-C, Asp-N Protein Cleavage Reagent

National Cancer Institute

## Source

National Cancer Institute. *Arg-C, Asp-N Protein Cleavage Reagent*. NCI Thesaurus. Code C161879.

A protein cleavage reagent comprised of a mixture of the bacterial endopeptidases Arg-C and Asp-N that cleaves proteins into peptides at the C-terminal side of a lysine or arginine residue and the N-terminal side of an aspartate residue.
