# Vulvar Cancer pT1 TNM Finding v8

National Cancer Institute

## Source

National Cancer Institute. *Vulvar Cancer pT1 TNM Finding v8*. NCI Thesaurus. Code C139601.

Vulvar cancer with tumor confined to the vulva and/or perineum. Multifocal lesions should be designated as such. The largest lesion or the lesion with the greatest depth of invasion will be the target lesion identified to address the highest pT stage. Depth of invasion is defined as the measurement of the tumor from the epithelial-stromal junction of the adjacent most superficial dermal papilla to the deepest point of invasion. (from AJCC 8th Ed.)
