Q1- Creating a table for the related works increases the paper's readability and makes it easier to compare with other approaches.

Q2.The references list should include more recent research in this field.

In modeling any system, resource management is an important issue. Please consider this aspect in your paper and use the following citations:

DOI: 10.32604/csse.2023.036629

<https://doi.org/10.1007/s10799-022-00358-8>

<https://doi.org/10.3389/frai.2022.950659>

Q3. Following the introduction, incorporating the objectives of the current work proves beneficial as it offers readers a concise overview of the paper's overarching goals and intentions. By delineating the objectives, the paper establishes its purpose and ensures that readers are well-informed and engaged as they progress through the subsequent sections.
