FDG-Positron Emission Tomography/Computed Tomography of an Area of Interest

National Cancer Institute

Source

National Cancer Institute. *FDG-Positron Emission Tomography/Computed Tomography of an Area of Interest*. NCI Thesaurus. Code C137868.

Positron emission tomography combined with computed tomography of an anatomical area of interest with the use of the contrast agent fludeoxyglucose F 18 (18F-FDG) to enhance the image.
