

Review of: "[Research note] Semantic Systems Theory"

Hongbing Yu

Potential competing interests: No potential competing interests to declare.

I liked the article. Most of the ideas, including the conclusion that “a semantic system is more than the sum of its inert elements”, seem to be truisms. That said, I would suggest including examples to illustrate the main points of the article in a more accessible way. A novel semantic systems theory deserves more than simply a new cluster of jargon.
