Mixed Phenotype Acute Leukemia, B/T/Myeloid, Not Otherwise Specified

National Cancer Institute

Source

National Cancer Institute. *Mixed Phenotype Acute Leukemia, B/T/Myeloid, Not Otherwise Specified*. NCI Thesaurus. Code C151991.

A very rare mixed phenotype acute leukemia, not otherwise specified in which the blasts show evidence of trilineage (B-cell, T-cell, and myeloid lineage) assignment. (WHO 2017)
