

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

B Andrews

Potential competing interests: No potential competing interests to declare.

The introduction part has not quoted recent articles.

The author must streamline the procedure with a simple form.

Figure quality and resolution are not clear; they must be enhanced.

The composite materials were confirmed without the characterization of XRD, FTIR, and SEM, etc. - justify.

Results and discussion parts are not sufficient.

Conclusion part must be revised as per the journal standard.

Based on the above comments, the present form of the manuscript **is not recommended** for publication.
