**Potential competing interests:** No potential competing interests to declare.

The topic presented "Tourists' Activities and their Impacts on Chinhoyi Caves Heritage Site, Zimbabwe", is interesting and concerns African countries that have such wealth. However, the analysis is too weak: there is no concept or theory, and the methodology chosen (interview) is limited. Data analysis is good but limited in the use of available data. It should be completed by a discourse analysis, and the words used.
