# Myxoid/round cell liposarcoma

INSERM

## Source

*INSERM. (1999). Orphanet: an online rare disease and orphan drug data base.*

*Myxoid/round cell liposarcoma. ORPHA:99967*

Myxoid/round cell liposarcoma (MRCLS) is a type of liposarcoma (LS; see this term) mostly located in the limbs, with a variable behavior depending on the histological subtype. Both myxoid and round cell are distinct histological subtypes of LS.
