The article is interesting and addresses issues new to the field. The author has done a good job and each section is well articulated.

Some points I would like to add are:

The abstract needs to be elaborated. Explain the methodology and tools used in the article and elaborate the results. Also, briefly describe the implications and originality of the article.

References are insufficient. recent articles from 2022 and 2023 should be cited in each section.

Before the conclusion add the implications of the process described and presented, they will improve the article.
