Hello Bu [Suryaningsih Soepardi](#)

Thank you for sharing your views. I would like to share some notes as I walked through your manuscript. The complete comments and notes are available here [https://hyp.is/go?](https://hyp.is/go?url=https%3A%2F%2Fwww.qeios.com%2Fread%2FHQGDW2&group=__world__)

[url=https%3A%2F%2Fwww.qeios.com%2Fread%2FHQGDW2&group=__world__](https://hyp.is/go?url=https%3A%2F%2Fwww.qeios.com%2Fread%2FHQGDW2&group=__world__) .

However the my main 3 points are:

1. It would be highly valuable if you could undertake a comprehensive comparison of the global scenarios regarding the implementation of initiatives and the corresponding public response across different regions. However, it is not necessary to incorporate this analysis within the confines of the current manuscript. Instead, creating a succinct table comprising multiple references from diverse countries would suffice at this juncture. Subsequently, you would have the opportunity to develop a separate, comprehensive manuscript that delves into a detailed comparison of the aforementioned aspects.
2. It is important to distinguish between the interests related to engaging with valuable materials through reading and the tools utilized for the act of reading itself. Furthermore, it is worth noting that there are individuals who continue to possess a deep passion for reading and derive great joy from extracting meaning from their literary experiences, while not placing significant emphasis on the tools employed for this purpose.
3. In my perspective, individuals who engage in reading today enjoy the privilege of selecting their preferred content, determining the timing, location, and sequence of their reading experience. With the abundance of semantic information available on the web, they are not bound by specific reading directions. Moreover, they have the freedom to discern between valuable and less useful readings. Considering the advancements in technology, it would be highly beneficial if people of all ages could prioritize consuming more useful and meaningful material over less beneficial ones.
