Potential competing interests: No potential competing interests to declare.

I am writing several recommendations to improve your manuscript.

1-) You can consider mentioning Islam in the title of your article.

2-) Instead of integrating, you can use another word.

3-) You can try to add more updated references to improve your manuscript.

4-) Following this, you can also note that all the so-called religious movements are likely akin, and the new religion was modernized with the latest one because of the corruption of scripture.

Perhaps the most profound doubt arises from considering and questioning whether beliefs about the afterlife held by Christians, Hindus, Buddhists, and Shintoists can simultaneously be considered valid. Otherwise, it would have to be postulated that one and a half billion followers of Hinduism are wrong in formulating their beliefs, just as millions of Buddhists and Shintoists are.

5-) In the Islamic book, the Quran, there is a reference to the Big Bang; you can also mention it if possible. You can search for Quranic verses on the expansion of the universe.

Contemporary knowledge of the universe's structure is based on the cosmological model that describes it as a vast, dynamic, and expanding system of space, time, matter, and energy. According to the Big Bang model, the universe began about 13.8 billion years ago from an unimaginably hot and dense state. Today, the universe comprises galaxies, stars, planets, as well as dark matter and dark energy, which constitute most of its mass and energy. Dark energy is responsible for the accelerating expansion of the universe, as confirmed by cosmological observations such as the redshift of distant galaxies.

6-) You can add limitations related to your narrative review.
